## Congress preamble:

Scholars and scientists have not argued about anything in the history of human knowledge as much as they did about the problem of man, were studying his past became “History,” and studying his relationships with his peers became “Sociology,” and studying his own behaviour became “Psychology,” and studying his raising others became “Education.”

It is inarguable that humanistic sciences existed by the existence of man and developed along with his development since the goal is not only expanding its fields that enriched human knowledge with new materials, but rather the drastic development that man has achieved while creating and developing the topics of said fields, aided largely by natural science fields.

The last century witnessed a systematic revolution in the humanistic sciences, not only in terms of the precise scientific results sought by new methodologies, but also in the form of the emerging humanistic issues imposed by contemporary life, such as globalisation, identity, culture clashes, the future of human relations in light of technology, and the humanitarian, social, and psychological problems caused by the emergence of Corona Virus at the end of the second decade of the twenty-first century.

Thus, the University of Bitlis Eren, along with Rimar Academy, have organised The III. International Congress of Humanities and Educational Researches, with in-person attendance in Istanbul and online teleconference 2th-4th of February 2022.

The event organisers extend their invitation to all scholars, academics, university professors, scientists, and all who are interested in the fields of humanistic sciences and contemporary studies to attend the event, providing a chance to contribute with new scientific views in response to the emerging contemporary humanistic issues in the modern society. The goal of this event can only be achieved through communication between the participants, lead by the head of the research team that the event organisers are trying to create.

#### **Congress Problematic:**

Humanistic sciences revolve around the nature of man himself since he is the only being with freedom and individuality, which are the traits that cannot be observed from an objective perspective, such as the case in natural sciences where a man can be a neutral element. This event aims to discover new visions on the topics of humanistic sciences and the development in those sciences in the 21st century.

#### **Congress vision:**

The III. International Congress of Humanities and Educational Researches seeks to become an open international platform for humanistic sciences scholars to display and share their research and new visions. The research and results of the event will be published in international science magazines, allowing scholars to use them to construct new scientific horizons on contemporary humanistic sciences that will pave the way for man to build his future.

#### **Congress goals :**

- 1- Providing a scientific platform for humanistic sciences, and convey the scientific visions to the public.
- 2- Discovering the new conclusions that result from contemporary humanistic studies.
- 3- Discovering new topics in the fields of contemporary humanistic studies.
- 4- Identifying and tackle the obstacles that face the scholars in the modern fields of humanistic studies.
- 5- Recognising scholars and scientists that added new concepts to contemporary humanistic studies fields.

## Controls for participation in the congress

The scientific committee of the congress receives research abstracts that feature new research treatments for their topics or provide added research values and results in the field of Social sciences.

A research summary of not less than 200 words shall be sent, and the abstract shall review the importance of the research, its objectives, the problem, and an introductory outline for the research according to the following characteristics:

The title must be included in the field of Social sciences and related matters.

- It must be in accordance with generally accepted scientific standards.

Not less than 200 words, and not more than 300 words.

- The title should be clearly written above the summary.

- The name of the researcher or researchers must be mentioned at the top of the abstract with the work place and the country.

- The contact information must be written down: email and phone number (WhatsApp number if available)

- A recent personal photo of the researcher or researchers shall be placed at the top of the page.

- A CV attached to a research summary email

The scientific committee reviews the research summaries it first reaches, informs the owners of accepted proposals and invites them to complete their research to participate in the congress.

- The entire research is sent after the congress held for publication in a refereed international scientific journal (Rimac Journal of Social and Human Sciences) with an international impact factor, or in a collective book issued by the forum with an international coding (ISBN) - according to the researcher's choice - and within the following conditions:

- The article sent for publication must be original, has not been previously published, and has not been sent for publication elsewhere.

- The first page should include the full title of the research, the name of the researcher, his academic degree, the institution of affiliation, in both Arabic and English, and the electronic address.

- The summary of the research written in two languages: Arabic and English.

- The research should not exceed twenty (20) pages, including the list of sources, references, tables, drawings and figures, and at least ten (8) pages in a Microsoft Word file, the page margin (2 cm from all sides), and between lines 0.1.

- Font type in Arabic: 14 (Simplified Arabic), the headline is 20 gras, and subtitles are 16 gras.

- Latin font: 12 (Times New Roman), headline 14 (Majuscule)

- Adopt APA system for Writing, Documentation and Quotations (<https://apastyle.apa.org/instructional-aids/reference-guide.pdf>)

## Notes

- Only single and pair entries are accepted.
- All incoming research is subject to confidential scientific arbitration, and is evaluated according to the following: originality, depth, the extent of its contribution to scientific research, integrity of presentation and language.
- Researchers are informed of receiving their research when it arrives (automated message) via their e-mail.
- They are informed of the progress of the arbitration process, with the need to make the necessary modifications if necessary.
